## IN THE UNITED STATES PATENT AND TRADEMARK OFFICE BEFORE THE BOARD OF PATENT APPEALS AND INTERFERENCES

Applicant:

G. King

Serial No.: 09/496.549

For:

ŗ

Method and System for Handling

**Telecommunications Data Traffic** 

Filed:

February 2, 2000

Group:

2662

Examiner:

A. Qureshi

Att'y Dkt.:

1996 P 07613 US 04

Reply Brief

**Assistant Commissioner for Patents** Washington, D.C. 20231

Sir:

This reply brief is submitted in response to the Examiner's Answer mailed January 28, 2003. On page 5 of the Answer, the examiner asserts that

since the termination unit, as claimed, has not been identified as a specific unit performing a specific function, it can be equated to Splitter 50, disclosed by McHale.

Section 11, second paragraph thereunder [italics in original]. This assertion ignores the plain meaning of the words of the claim and the specification. "Although the PTO must give claims their broadest reasonable interpretation, this interpretation must be consistent with the one that those skilled in the art would reach." In re Cortright, 165 F.3d 1353, 1359, 49 U.S.P.Q.2d 1464, 1468 (Fed. Cir. 1999), cited in M.P.E.P. § 2111 (8th ed., August 2001), ¶ 2, p. 2100-47. The examiner's reasoning fails on this ground.

As discussed on page 2 of the brief on appeal, the claimed termination unit is a specific device performing a specific function, and this terminology is used consistently throughout the specification and the claims, appearing in both the preamble and the body of the independent claims. Equating a splitter with a termination unit fosters an interpretation "[in]consistent with the one that those skilled in the art would reach." Id. Therefore, the applicant respectfully requests that the Board reverse the examiner.

Dated: March 31, 2003

Respectfully submitted.
